Hi, Susie --

Thanks for the email. I am so sorry for what you have endured. I am enclosing the latest ASTRO policy as well as the "new" Anthem policy statement on proton therapy that I proved was hopelessly wrong and out of date. Please forward me your cell number and your address and further contact info. I'm going to put you in touch with a couple of people and we are going to make you and your daughter a part of this story.

Regards,

Jack Weber

Jack,

I just wanted to thank you for the link to your press conference. Lesley was turned down the first time based on the THER-RAD 00002 policy also. It states in the policy Hodgkin's lymphoma can be treated by proton. They may fight back because she aggressive large B cell Non Hodgkin's. ASTRO's new guidelines has thoracic metastases are covered. The man I spoke with from the VA State Insurance Commission told me to look at their policy to see what is said and when I google the Anthem Proton Radiation Policy, I did not find the current one. We went to UVA July 21st and to Hampton on July 28th. We were instantly denied on July 31st. Before we went to Hampton we called Anthem to see if they covered Proton and were told yes. Because we went back and forth with them doing the appeals, contacting the insurance bureau, contacting Senator Steve Newman and delegate Bob Goodlatte, and contacting a lawyer, a month went by and Lesley was readmitted to the hospital and a CT scan showed her tumor was growing again. Anthem knew we needed an emergency approval so she could begin radiation. She is 32 years old with a tumor next to her heart. Congratulations on your approval and God bless you and your wife. If I can't help Lesley, I hope to expose Anthem for others to benefit.

Susan
